

Neuroendocrine Cell Hyperplasia of Infancy (NEHI): Two \$41,000 grants or one \$82,000 grant* will be awarded depending on the merit, feasibility, and budget justifications (solicited budget level must be indicated on your LOI).

The purpose of this RFA is to advance research or projects already in progress or to initiate new research or studies. Examples of priority topics include but are not limited to (1) increasing understanding of pathology (including Genetics); (2) quicker and more accurate diagnosis; (3) quality of life improvements; (4) development of treatments or cure.

Previous awardees of grants supported by NEHI Research Foundation must describe progress, publications, and other funding awarded as a result of data generated from those grants. They should also describe how the new proposal is distinct from previous one(s).

This grant is made possible by NEHI Research Foundation.

*Please submit a proposal for the total amount of \$82,000. The ODC may choose to fund two awards at \$41,000 each, at which point we will request a revised work plan and budget.
